- Any loss of any language or social skills at any age.

What if my doctor says my child is behind on meeting developmental milestones?

If your child is Birth –Three: Infant Toddler Services

If your child is 3-5: Early Childhood Special Education

What is early intervention?

Early intervention is a system of services that helps young children with developmental delays or disabilities. Early intervention focuses on helping eligible babies and toddlers learn the basic and brand-new skills that typically develop during the first three years of life, such as:

- Physical (reaching, rolling, crawling, and walking)
- Cognitive (thinking, learning, solving problems)
- Communication (talking, listening, understanding)
- Social/emotional (playing, feeling secure and happy)
- Self-help (eating, dressing)
